

You can make a 10 to help you add 9.

Move 1 counter from 6 to 9.

Now I have 10 and 5.

10 + 5 is the same as 9 + 6.

10	so	9
+ 5		+ 6
15		15

The sums are the same!

- How do the ten-frames show this addition problem?

- How many yellow counters should you move?
- Where should you move the counter?
- How do you know to move only one counter to make 10?

- How many counters does the top ten-frame have after 1 counter was moved?
- How many are in the bottom ten-frame?
- Will the total number of counters still be the same?
- How do you know?

- How do the ten-frames and counters show that 10 + 5 has the same sum as 9 + 6?
