

You can add on a hundred chart.
Find $54 + 18$.

Start at 54. You need to add the tens from 18. Move down 1 row to show 1 ten.

51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80

Now add the ones.

You're already at 64. Now move ahead 8 to show 8 ones. I need to go to the next row to add them all. So, $54 + 18 = 72$.

51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80

- How many rows down from 54 is 64?
- How many tens is that?
- How much more is 64 than 54?

- How many spaces to the right of 64 is 70?
- How many more ones must you add?
